

Passionate and dedicated Senior Software Engineer with 6+ years of experience, specializing in full-stack development and microservices architecture. Known for innovative problem-solving abilities and collaborative approach, eager to join a progressive company where my technical expertise, leadership skills, and passion for innovation to build transformative software solutions could drive business success and enhance user experiences.

Summary of Qualifications

- **Software Development & Data Science:** Proficient in developing full-stack solutions, including KPI dashboards for data visualization. Currently focused on AI-driven projects in data science.
- Software Development (Expert), Data Science (Intermediate)
- Languages: C#, Java, Python, JavaScript
- Technologies & Frameworks: ASP.NET, .NET Core, Angular, React, AngularJS, EFCore, Dapper, Spring Boot, Authorize .NET, Scikit-learn, Keras, Albumentations, Flask, Selenium
- Data Visualization: Tableau, JS libraries (Chart.js, Nivo)
- Databases: MS-SQL, Oracle, MySQL
- AI/ML: Experience in applying machine learning algorithms, including Regression, SVM, K-means, Random Forest, and CNN.

Work Experience

Team Member (Part-time) 02/2025 - Present

Momo 2 Go, Scarborough, ON

- Delivered prompt, courteous service by taking accurate orders, handling transactions, and addressing customer concerns in a fast-paced QSR environment.
- Maintained a clean, organized work area and assisted team members during busy periods to ensure smooth restaurant operations.
- Assisted kitchen staff with food prep, restocking, and maintaining workflow during peak hours to ensure timely service.

Sr. Software Engineer (Team Lead) 12/2019 - 02/2024

Percoid IT Solutions, Lalitpur, Nepal

- Led the development of scalable management systems and reporting tools using .NET, MS-SQL, Angular, and Chart.js.
- Improved database performance by optimizing complex SQL queries and implementing indexing strategies.
- Supervised and mentored junior developers, ensuring timely delivery and team growth.

Software Engineer 01/2018 - 12/2019

Elite Solutions, Lalitpur, Nepal

- Maintained and enhanced legacy full-stack applications built with .NET and MS-SQL.
- Developed and optimized SQL queries to boost system efficiency and data accuracy.
- Contributed to FinTech projects with a focus on card-based transaction systems.

Education and Training

Ontario College Graduate Certificate in Artificial Intelligence & Data Science 04/2024 - Present
Loyalist College in Toronto, ON

Bachelor's Degree in Computer Engineering 07/2012 - 10/2016
Kathmandu Engineering College, Kathmandu, Nepal

Projects

Weather Trend Forecasting

A well-structured data science project which includes data preprocessing, EDA and model training along with evaluation for a geographical weather dataset obtained from Kaggle.

Role: Data Scientist

Tech Stack used: Python

Models used: ARIMA, Naïve, Holt Winters

CalSnap (Calorie Tracker Web App)

A web app to get caloric information based on the image uploaded by the user which will provide insights on the health factor along with a dashboard showing historic caloric information and trends related to it.

Role: Front end Developer, Data Scientist

Tech Stack used: Python, React, Nivo

Corporate Projects

Quantum (Media Management System)

Billboard & media management system used in multiple countries by more than 200 outdoor media groups like JCDecaux, IMC, etc which includes full-fledged process of managing a billboard from the initial contract/proposal creation to the final installation process.

Role: Full stack Developer

Tech Stack used: .NET Core, MS-SQL, EFCore, Dapper, SignalR, AngularJS, HTML, CSS

Quantum Utility API; Charge Deduction API

Modular middleware REST APIs for creating PDF, Screenshot (Quantum Utility) and handling the requests of card transaction from Bank's CBS (Core Banking System) through ISO 8583 format (Charge Deduction).

Role: Full stack Developer

Tech Stack used: .NET Core, Swagger (Quantum Utility API); Java, Spring Boot (Charge Deduction API)

QReporting

Reporting tool for Quantum system which includes KPI dashboard and reports related to no. of sales, revenue, contracts/proposals and other factors

Role: Full stack Developer

Tech Stack used: .NET Core, MS-SQL, EFCore, Dapper, Angular, Chart.js

CCOMS (Card Centre Operation & Management System)

An internal bank application which automates the complete process of a card provided by the bank, starting from card requests from the customer till the card delivery to the customer.

Role: Full stack Developer

Tech Stack used: ASP.NET MVC, MS-SQL, EF, JQuery, HTML, CSS
